DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a method for bending a preformed thermoplastic polymer extrusion, classified in class 264, subclass 295.
 - II. Claims 18-20, drawn to a window and frame therefor, classified in class 52, subclass 204.71.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by bending an extrusion formed by extruding rather than casting (e.g., filling).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention of Group I:
 - A1. The embodiment wherein heating the extrusion is performed by heating in a glycol bath (apparently claims 8 and 15);
 - A2. The embodiment wherein heating the extrusion is performed by heating by infrared radiation (apparently claims 9, 16 and 17); and
 - A3. The embodiment wherein heating the extrusion is performed by heating by heated air (apparently claim 10).

Art Unit: 1732

If Group I is elected by the applicant, applicant is required under 35 U.S.C. 121 to elect a single disclosed species from A1, A2 and A3 for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

This application contains claims directed to the following additional patentably distinct species of the claimed invention of Group I:

- B1. The embodiment wherein foam is filled into the at least one cavity by injection (apparently claim 12); and
- B2. The embodiment wherein foam is filled into the at least one cavity by hand pouring (apparently claim 13).

If Group I is elected by the applicant, applicant is further required under 35 U.S.C. 121 to elect a single disclosed species from B1 and B2 for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, claim 1-7, 11 and 14 appear to be generic to all species of the claimed invention of Group I.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1732

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
